**SHEET VINYL CUTTER
SC SERIES**

SHEET VINYL CUTTER
SC SERIES WITH DRAWCUT PRO

Secabo's SC30 sheet vinyl cutter automatically cuts out stickers and similar objects from sheets sized up to 330mm × 488mm with complete contour accuracy. The SC30 automatically reliably draws individual sheets from a stack of up to 50 sheets (depending on the material). Various printable self-adhesive materials such as paper and film can be used. The cutting system's maximum contact pressure of up to 750g also allows for cutting laminated printouts. Thanks to the well-known crop mark recognition system LAPOS Q, a barcode with the corresponding cut job's identifier is read at the beginning of each sheet in addition to the crop marks and the associated data is automatically retrieved from DrawCut PRO. Thus, sheets with different cut jobs can be mixed.

User intervention is not required. The SC30 sheet vinyl cutter is the ideal machine for reliable and automatic production of contour-cut stickers and labels in the business areas of copy shops, product labeling, office applications and many others.

FEATURES

High precision

Highest levels of precision when cutting the smallest fonts and objects.

Simple menu navigation

Comfortable menu navigation by means of a backlit LCD screen and control panel with large buttons.

Plug and Play

Everything you need to operate the device is included in the scope of delivery.

Various formats

You can choose to process media and printed templates in DIN A4, DIN A3 as well as DIN A3+.

DrawCut PRO

DrawCut PRO included – with controller for LAPOS XPT, vectorization, text to path, shading and many other features

LAPOS Q

State-of-the-art contour cutting function for print & cut applications, automatic continuous recognition of crop marks.

Servo motors

Extremely quiet, precise and powerful servo motors for optimal cutting results.

Automatic feeder

Depending on the material thickness, you can insert up to 50 sheets at once and have them automatically cut one after the other, with high contour-precision and independent of the motif.

TECHNICAL DATA

SC30

Max. sheet size	330mm × 488mm
Max. cutting area	320mm × 478mm
Max. media thickness	0,5mm
Max. cutting speed	960 mm/s
Drive	Servo motors
Contact pressure	50g - 750g
Interfaces	USB
Software	DrawCut PRO for Windows
Contour cut function	LAPOS Q, sequential crop marks backlit graphic
Controller	LCD screen, gel buttons
Net weight	36kg
Weight with packaging	56kg
Dimensions	65cm × 51cm × 37cm
Scope of delivery	Sheet vinyl cutter, multilingual cutting software DrawCut PRO (Windows), drag knife, ball-bearing knife holder, plot pen, connection cable, user manual in English
